

MSDS Service Info

At the March meeting Dave Phillips gave staff information on MSDS (Material Safety Data Sheets) that eliminate having to carry all the sheets to the job site. Instead you have a sign that you post with an 800 number which gives you 24 hour, 7 days a week, 365 days a year access to your trade specific products in order to obtain a needed MSDS. The association is investigating a partnership with them to obtain a discount for members. We will try to arrange having a representative do a presentation on OSHA compliance and the cost in the next few months.
